

Apartments + Multi-Units

BizRecycling helps improve recycling for tenants.

BizRecycling works directly with property managers to improve recycling infrastructure and educate tenants on recycling. Providing recycling at your property is a win-win for you and your tenants.

- Residents expect recycling services.
- In Minnesota recycling in apartment buildings, condos, and townhomes is required by the commercial recycling law.
- An efficient recycling system helps tenants recycle better, and reduces contamination and illegal dumping at your property.
- By “right-sizing” trash and recycling services, you can cut costs by requiring fewer trash pickups.
- Unlike garbage services, which are subject to county and state taxes, recycling is tax-free.

A successful recycling program involves more than putting out carts and dumpsters. For a customized improvement plan for your property and to access grant funding contact us to connect with a Sustainability Specialist!

Ask Jami from Rose Mall Apartments

BizRecycling equipped Rose Mall Apartments property manager Jami Olson with recycling resources to help her encourage and educate her tenants, new recycling containers in public areas of her building, and an enclosure for waste and recycling carts. With the plan and resources in place, Jami noticed less contamination in the recycling carts—meaning lower hauling costs. Jami was so pleased with the outcome that she’s already working with BizRecycling at another property she manages. Scan the QR code at left or visit BizRecycling.com/Apartments to hear more of Jami’s story.
